1290 SUPER ADVENTURE R PRE REG FEATURES

ENGINE

With a sledgehammer hit of 160 hp and a massive 138 Nm of earth-twisting torque, the proven V-twin LC8 engine once again takes the accolades as the most compact, lightest, and best performing engine in the segment. Its greener too, meeting all EURO5 regulations and will deliver 15.000 km service intervals and low fuel consumption, trip after trip, mile after mile.

SUSPENSION

The KTM 1290 SUPER ADVENTURE R is fitted with high-performance WP XPLOR suspension which was co-developed with test rider Quinn Cody at the helm. A WP XPLOR fork with 48 mm inner tubes takes care of business at the front and has been derived from the successful KTM off-road models, and features split fork technology and all-new settings for even better offroad performance. At the rear, is a high-end PDS monoshock, which is fully adjustable in spring preload with an external handwheel, rebound, a

FRAME

A new, reworked, and lightweight, chrome-molybdenum stainless steel trellis frame featuring laser-cut tubes, combines with forged elements for an ultra-strong component on the KTM 1290 SUPER ADVENTURE R. The steering head has been moved 15 mm rearwards, to shorten the overall frame for improved cornering behavior, while the front engine mount has been rotated forward by 2 degrees to aid in hard acceleration, keeping the front end firmly planted on the ground.

WHEELS

Serious offroad exploration demands hardcore equipment. The spoked wheels of the KTM 1290 SUPER ADVENTURE R feature new and robust aluminum rims made for KTM by AKRONT, with an improved sealing system to make them 100% tubeless. What's more, is that instead of the typical rubber band sealing the rim to prevent air from leaking through the nipples, the wheels have an O-ring seal on each nipple.

BRAKES

Precise. Powerful. Consistent. Just as you would expect from a set of BREMBO brakes. Up front you'll find twin 320 mm diameter discs, which are radially mounted, plus 4-piston fixed calipers. At the rear, excess speed is taken care of by a generously dimensioned 267 mm diameter disc. And in case of an emergency, Bosch's two-channel 9M+ ABS is there to save the day.

DASHBOARD

Taking charge at the helm is a scratch-resistant 7-inch TFT display. Unmatched in terms of graphics and readability, adventurers can access information on the fly, quickly and easily without navigating complex menus. This comes thanks to a 6-way switch cube on the handlebar and the quick select and favorites buttons. Connectivity is also taken care of by way of KTMconnect, which connects via Bluetooth for Turn-by-Turn+ navigation, music, and even answering calls. Still catching glare? The TFT sc
